because, while the phrase "risk management" has a strong flavor of top-down management styles, it reminds us that risk management is truly an industry-wide and organizational-wide, group effort.

Definition of Aviation
Safety Management

Online Library

Aviation Risk

System A safety management system in aviation commonly refers to a set of processes and tools to formally manage a structured safety program. Safety management in aviation is not a new, 21st century topic. Even before man started flying, there were safety management programs
