The Oracle Fusion Applications Extensibility Guide walks you through the customization process for all Oracle Fusion applications, not just within Oracle Fusion CRM. After reviewing that guide, you can then review the Oracle Fusion CRM Extensibility Guide to understand in more detail how to use the Application Composer to extend and customize an application within Oracle Fusion CRM.

~~**Oracle Fusion Applications CRM Extensibility Guide**~~

Extensions Manager is a self-service tool which migrates only CRM customizations that are created in the Oracle Fusion CRM Application Composer. Extensions Manager is specific to CRM and migrates only CRM Application Composer customizations, from one Oracle Fusion instance to another on the same release, such as from a source development environment to a target production environment.

~~**Oracle Fusion Applications CRM Extensibility Guide**~~

Oracle Fusion Applications Extensibility. The Application Composer is but one tool that lets you customize and extend your Oracle Fusion CRM applications. To learn more about extensibility options that are available to you across all Oracle Fusion applications, see the Oracle Fusion Applications Extensibility Guide for Business Analysts.

~~**Oracle Fusion Applications CRM Extensibility Guide**~~

For key objects in Oracle Fusion CRM applications, predefined extension dimensions exist which include custom or extended attributes. This functionality enables users to create reports on extensions that are made to standard objects.

~~**Oracle Fusion Applications CRM Extensibility Guide**~~

Using Oracle Fusion CRM Application Composer, you can change many items that appear on the simplified set of pages that are available for opportunities. The pages that are available for extensibility using Application Composer are listed below, and are described in this topic. Opportunity overview table. Create Opportunity page . Edit Opportunity page
