Fusion of powers is a feature of some parliamentary forms of government, where the executive and legislative branches of government are intermingled. It is contrasted with the European separation of powers found in presidential and semi-presidential forms of government where the legislative and executive powers are in origin separated by popular vote. . Fusion of powers exists in many, if not ...

Fusion of powers - Wikipedia
Install a cold air intake. The four-cylinder engine in your vehicle is powered by compressing a mixture of air and fuel and igniting it. Because the level of compression your engine will produce is a constant (determined by the piston throw) you can produce more power by allowing for the flow of more air and fuel into the engine itself.
